Part I Installation Guide for UNIX Platforms

1. Preparing for Installation

What's New in This Release	1-2
Licensing Process	1-2
Installation Script	1-3
Checking Your Hardware and Software Configuration	1-3
Supported Hardware and Operating Systems	1-3
Additional HP-UX Requirements	1-4
Multiple Platform Installation	1-4
Supported C Compilers	1-6
Disk Space Requirements	1-7

Memory Requirements	1-7
Accessing Memory Beyond 2 GB	1-8
Determining Your Site Identification Number	1-9
Creating the Synopsys Simulation Root Directory	1-10
Defining the SYNOSYS_SIM Environment Variable	1-10
Installing a CD	-11
Mounting the CD	1-11
Loading the Files From the CD	1-12
Unmounting the CD	1-13
 2. Installing and Verifying the Simulation Tools	
Transferring the Files from the Simulation CD	2-2
Configuring the Simulation Tools	2-5
Setting Up System-Wide Defaults for the Simulation Tools	2-5
Setting Up the Simulation Tools for Each User	2-6
Verifying the Simulation Licensing	2-8
Verifying the Simulation Installation	2-10
Verifying the Simulation Tools Installation	2-11
Simulation Online Documentation	2-12
 3. Troubleshooting	
Memory	3-2
Why Do I Get an “out of memory” Message?	3-2

What Should I Do When an “out of memory” Error Occurs?	3-4
X Windows System	3-6

Part II Installation Guide for NT Platforms

4. Preparing for Installation

What’s New in This Release	4-2
Licensing Process	4-2
Platforms	4-3
Checking Your Hardware and Software Configuration	4-3
Supported Hardware and Operating Systems	4-3
Minimum Disk Space Requirement	4-4
Memory and Virtual Memory (Swap Space)	
Requirements	4-4
Physical Memory Requirements	4-4
Swap Space Requirements	4-5
Balancing Physical Memory and Swap Space Requirements	4-5
Supported File Systems	4-5
Checking Installation Prerequisites	4-6
Suggested Third-Party Software	4-7
Determining Your Site Identification Number	4-8

5. Installing the Simulation Tools

Getting Started	5-2
Installation Steps	5-2
Exiting Installation	5-3
Running the Installation for Simulation	5-4
Viewing the Main Welcome Window	5-5
Setting Environment Variables	5-6
Setting Licensing Variables	5-7
Choosing Products	5-8
Viewing the Installation Configuration Summary	5-8
Installing the Simulation Tools	5-9

6. Running the Simulation Tools

Locating Files and Directories	6-2
Starting the Tools From the Command Prompt	6-3

7. Comparing Operating Systems

Specifying Files	7-2
Comparison of Path Specifications	7-2
Universal Naming Convention Path Names	7-3
Backslash (\) Versus Forward Slash (/)	7-3
Note On File Naming Conventions	7-4
Using Environment Variables	7-4

Using Operating System Supplied Commands	7-5
Frequently Used Shell Commands	7-5
8. Troubleshooting	
How Do I Run Synopsys Tools on a Stand-Alone Machine?	8-2
Installing and Configuring IPX/SPX	8-2
Getting a Valid License Key From Synopsys	8-3
How Do I Set Up My System to View Man Pages?	8-4
How Do I View Help Pages?	8-5
9. Setting Environment Variables	
System and User Environment Variables	9-2
Using Windows NT Dialog Boxes to Set Variable Values	9-2
Setting System Variables	9-5
Setting User Variables	9-6
Setting the Path Variable	9-6
Adding Variables	9-8
Setting Environment Variables Using the Command Prompt Window	9-8
10. Creating a Home Directory
